osservatorio clima  
emilia-romagna

**Periodo di riferimento:**  
1961-1990

**Periodo di proiezione:**  
2021-2050

**Scenario** emissivo:  
RCP 4.5

**Fonte dati:**

Dataset Eraclito v. 4.2

**Metodo di elaborazione:**

Regionalizzazione  
statistica applicata a  
modelli climatici globali

**Temperatura media annua**

**Temperatura massima estiva**

**Temperatura minima invernale**

1961-1990

2021-2050

**Precipitazione annua**

1961-1990

2021-2050

**Durata massima delle onde di calore estive**

3

giorni consecutivi

1961-1990

9

giorni consecutivi

2021-2050

**Periodo massimo senza precipitazioni in estate**

25

giorni consecutivi

1961-1990

32

giorni consecutivi

2021-2050

**Notti tropicali estive**

7

notti estive
