a world of soil... ..a sustainable world!

Can Soil Solve the Climate Crisis?

leapsmag

When Rattan Lal was awarded the Japan Prize for Biological Production, Ecology in April-the Asian equivalent of a Nobel-the audience at Tokyo's National Theatre included the emperor and empress. Lal's acceptance

Key aspects of environmental protection in Switzerland

 House of Switzerland

Lakes, mountains and clean air are associated with Switzerland's quality of life. Beyond its picture postcard image, the natural environment is an integral part of Switzerland's identity and has forged the national spirit.

As southern Spain dries up, its farmers get inventive

 The Christian Science Monitor

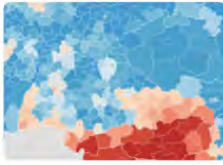

Spain today is the world's third-largest almond producer. But climate change, coupled with soil erosion, threatens to change that, not just for the almond crop, but for the wider fruit basket that is Spain.

Saving our soils: An in-depth briefing on climate-smart agriculture

Ethicalcorp

This month we have a fresh look for our digital magazine, and a fresh angle on one of the most important issues facing responsible business, the sustainability of our food and agriculture systems. Rather than the hi

Europe's soil hotspots

POLITICO

Europe's soil is washing away. It can take hundreds of years to generate a centimeters of fertile topsoil, and only a strong wind or unexpected flood to wash it away. The European Commission estimates Europe loses 9
