INDICE

SEZIONE A - TERMOMETRIA

Abbreviazioni e segni convenzionali - Contenuto delle Tabelle - Consistenza della rete termometrica ..... Pag. 5
Elenco e caratteristiche delle stazioni termometriche ..... Pag. 6
Tabella I - Osservazioni termometriche giornaliere ..... Pag. 12
Tabella II - Valori medi ed estremi delle temperature ..... Pag. 82

SEZIONE B - PLUVIOMETRIA

Abbreviazioni e segni convenzionali - Terminologia ..... Pag. 99
Contenuto delle tabelle - Consistenza della rete pluviometrica ..... Pag. 100
Elenco e caratteritiche delle stazioni pluviometriche ..... Pag. 101
Tabella I - Osservazioni pluviometriche gioranliere ..... Pag. 111
Tabella II - Totali annui e riassunto dei totali mensili delle quantità di precipitazioni ..... Pag. 215
Tabella III - Precipitazioni di massima intensità registrate ai pluviografi ..... Pag. 228
Tabella IV - Massime precipitazioni dell'anno per periodi di più giorni consecutivi ..... Pag. 237
Tabella V - Precipitazioni di notevole intensità e breve durata registrate ai pluviografi ..... Pag. 251
Tabella VI - Manto nevoso ..... Pag. 260

Elenco alfabetico delle stazioni termopluviometriche ..... Pag. 271

Sezione A - TERMOMETRIA

Abbreviazioni e segni convenzionali

Termometro a massima e minima	Tm
Termometro registratore	Tr
Dato incerto	?
Dato mancante	»
Dato interpolato	[ ]

Sono stampati in **grassetto** ed in *corsivo* rispettivamente i valori massimi ed i valori minimi.

CONTENUTO DELLA TABELLA

I dati sono trasmessi da stazioni termopluviometriche e da osservatori dipendenti direttamente o controllati dall'Ufficio. Ogni stazione e' fornita di un termometro a massima e a minima, che viene osservato ogni giorno alle ore 9 antimeridiane. Il valore massimo rilevato vienne assegnato al giorno precedente; quello minimo al giorno stesso dell'osservazione. Ogni stazione automatica Tr e' fornita di sensore per il rilevamento della temperatura. I valori massimo e minimo assegnati al giorno si sono verificati dalle ore 0 alle ore 24 del giorno stesso. Le stazioni sono ordinate nelle tabelle secondo la rispettiva posizione idrografica. Le tabelle sono precedute dall'elenco e caratteristiche delle stazioni termometriche che hanno funzionato nell'anno

TABELLA I. - Sono riportati, per le stazioni che hanno regolarmente funzionalto nell'anno, i valori massimi e minimi rilevati giornalmente e le rispettive medie mensili, unitamente alla temperatura media del mese, dell'anno cui si riferiscono le osservazioni e del precedente periodo di osservazione.

TABELLA II. - Per le stazioni della tabella I sono riportate:

a) le medie mensili ed annue delle massime e delle minime temperature osservate giornalmente e le medie mensili ed annue delle temperature diurne. Come <<temperatura diurna>> e' assunto il valore della semisomma delle temperature massime e minime osservate in uno stesso giorno;

b) le temperature estreme (massima e minima) osservate in ogni mese e nell'anno, ed il giorno nel quale sono state osservate.

Tutte le temperature riportate sono espresse in gradi centigradi e corrispondono alle letture effettivamente eseguite, non essendosi effettuata la riduzione al livello del mare.

CONSISTENZA DELLA RETE TERMOMETRICA AL 31 DICEMBRE 1988

Sezione B - PLUVIOMETRIA

Abbreviazioni e segni convenzionali

Pluviometro comune	P
Pluvionivometro	Pn
Pluviometro registratore	Pr
Precipitazione nevosa (misurata al pluviometro)	*
Precipitazione nulla	-
Dato incerto	?
Dato mancante	»
Dato interpolato	[ ]

Sono stampati in **grassetto** ed in *corsivo* rispettivamente i valori massimi ed i valori minimi.

T E R M I N O L O G I A

1. - Altezza di precipitazione (mm): quoziente del volume di acqua raccolta nel pluviometro (compresa eventualmente la neve sciolta) per l'area della superficie orizzontale dell'imbuto raccoglitore.

2. - Giorno piovoso: giorno in cui e' stata misurata un'altezza di precipitazione uguale o superiore ad un millimetro.

3. - Intensita' media di precipitazione, in un dato intervallo di tempo: quoziente dell'altezza di precipitazione nell'intervallo per la durata di questo.

CONTENUTO DELLA TABELLA

Le tabelle sono precedute dall'elenco e caratteristiche delle stazioni di osservazione che hanno funzionato nell'anno. I valori delle precipitazioni riportati sono espressi in millimetri di acqua e comprendono pioggia e neve fusa.

TABELLA I. - Per ogni stazione riporta la quantita' di pioggia caduta giornalmente ed i totali mensili ed annui della precipitazione e del numero dei giorni piovosi. Per le stazioni dotate di apparecchiatura a lettura diretta (pluviometri e pluvionivometri) le osservazioni vengono eseguite ogni giorno generalmente alle ore 9 ed il risultato viene attribuito al giorno stesso della misura; il valore segnato rappresenta quindi la quantita' di precipitazione caduta nelle 24 ore che hanno preceduto la misura. Per le stazioni dotate di pluviografo si riporta, per ogni giorno, la quantita' di pioggia che dal diagramma risulta caduta nelle 24 ore comprese fra le ore 9 del giorno precedente e le ore 9 del giorno di cui si tratta. Per analogia il suddetto criterio e' mantenuto anche per le stazioni automatiche a rilevamento elettronico. Con il carattere grassetto e' stampato il massimo quantitativo giornaliero misurato per ogni mese.

TABELLA II. - Per le stesse stazioni di cui alla tabella I, riporta i totali mensili ed annui delle quantita' di precipitazione. Per ciascuna stazione e' riportato in grassetto il piu' elevato dei valori mensili ed in corsivo il piu' basso.

TABELLA III. - Per le stazioni dotate di pluviografo riporta i dati relativi ai valori piu' elevati delle precipitazioni registrate nell'anno, per 1, 3, 6, 12 e 24 ore consecutive appartenenti o no allo stesso giorno. Sono considerate le precipitazioni iniziate dopo le ore 0 del primo gennaio e quelle eventualmente terminate dopo le ore 24 del 31 dicembre.

TABELLA IV. - Per tutte le stazioni che hanno regolarmente funzionato nell'anno riporta i massimi valori delle precipitazioni verificatesi per 1, 2, 3, 4 e 5 giorni consecutivi, appartenenti o no allo stesso mese. Sono considerati solamente i periodi il cui inizio cade entro l'anno anche se eventualmente sono terminati nell'anno successivo. Per le durate da 2 a 5 giorni le altezze possono talvolta essere uguali a quelle di durata inferiore; il periodo indicato e' sempre quello nel quale si e' verificata l'altezza considerata. E cio' per evitare che il massimo di 2 giorni possa risultare inferiore a quello di un giorno e cosi' via.

TABELLA V. - Riporta il valore, la durata e la data delle precipitazioni di maggiore intensita' e di breve durata registrate ai pluviografi.

TABELLA VI. - Riporta, per alcune determinate stazioni, per i mesi da gennaio a maggio e da ottobre a dicembre, nei quali possono verificarsi precipitazioni nevose:

a) le altezze, in centimetri, dello strato nevoso sul suolo presente nell'ultimo giorno del mese;

b) la quantita' di neve, in centimetri, caduta nel mese;

c) il numero di giorni nei quali si sono avute precipitazioni nevose;

d) il numero complessivo dei giorni di permanenza della neve sul suolo.
